RAYZONE

Rayzone Group designs and manufactures Cyber & Intelligence solutions for governmental and federal agencies, based on broad expertise and operational experience accumulated within the framework of the Israeli Cyber & Intelligence agencies.

Certified by ISO 9001, ISO 14001 and ISO 18001 standards, Rayzone group has been providing technologies for law enforcement agencies for more than 15 years, operating in more than 40 countries, with local offices in several countries.

Rayzone Group's systems are the culmination of decades of experience in varied areas, which includes: **Intelligence experts**. Rayzone's intelligence expert are dealing with fields of; Sigint, Cyber, Humint, Visint, Osint, Geoint and analysis. This varied and intense experience enable the company to develop innovative intelligence systems that relies on new and up to date perceptions and methodologies; **Field operations** – Rayzone's field agents are all ex-special operation officers, which were involved in most sensitive operations. At Rayzone group we utilize their experience to enrich our costumer's field capabilities; **Software and Hardware engineers** – Our R&D division incorrupt specialists in the fields of communications, IT, cyber, big-

data, web, mobile and other. This enables us to specialize in the design and manufacturing of cutting edge intelligence systems.

Based on our experience and our in-house engineers, Rayzone Group has established a comprehensive methodology that is based on unique and innovative technologies, which provides cutting edge intelligence gathering and analysis capabilities. Rayzone Group concept and solutions focuses on improving awareness of the threat, developing capabilities to prepare and respond, and enhancing law enforcement agencies capabilities. Our solutions provide cutting edge intelligence gathering and analysis capabilities.

Rayzone Group is driven by innovation, enthusiasm, experience and above all by its people. In Rayzone Group we believe that business is being done by people, not technology.

We look forward to meeting your requirements, in order to fulfill our goal of ensuring that our clients are continuously provided with the most advanced solutions, to optimally meet their particular needs.

RAYZONE PORTFOLIO

- **TA9 IntSight – Intelligence and Investigation Hub.** IntSight is a powerful and versatile data analysis platform, enabling specialist intelligence and law enforcement agencies to produce valuable insights from their masses of data.
- **GeoMatrix – GeoLocation Intelligence system.** GeoMatrix is a unique SS7 protocol-based solution that enables intelligence and law enforcement agencies the ability to locate, track, and manipulate any 2G / 3G / 4G subscribers covertly virtually anywhere in the world, all in real-time using a very friendly GUI and graphical supported maps.
- **Echo – Global Virtual Sigint System.** ECHO is a strategic Sigint system, which provides intelligence and law enforcement agencies a remote and transparent wide and varied information on internet users.
- **Vegas - Virtual-ISP Interception system.** Vegas is a strategic inline interception system. Vegas enables intelligence and law enforcement agencies remote, stealth and ISP independent inline interception capabilities from targeted IP networks, in different locations.
- **Piranha – 2G, 3G and 4G IMSI catcher.** Piranha enables intelligence and law enforcement agencies to automatically capture mobile phone identifiers, can manipulate them and create the basis for smart intelligence and analysis.

- **Sprinter - Active 2G, 3G AND 4G Interception System.** Sprinter is an off-the-air tactical active interception system for 2G/3G/4G cellular networks. Sprinter allows to intercept and record voice calls, text messages and to retrieve target's location.
- **Optimus - Comprehensive OSINT Solution.** OPTIMUS provides immense collection and harvesting capabilities. OPTIMUS covers traditional websites, news sites, social media, blogs, and dark web. The system provides Virtual HUMINT avatar management which enables to reach into closed networks and forums.
- **ArrowCell – Detector, Preventer and Locator of Active GSM Interception.** ArrowCell product family, offers a real-time comprehensive solution of full protection against active GSM interception systems.
