NAV-26

Safety Limit-Switches for Lifting Appliances and other Equipment

This is to emphasize that safety measures on board all Israeli ships must be complied with, at all times.

All machinery on board ships, whether lifting appliances (of all kinds), life-boat's davits, passenger or service lifts etc. shall be in proper operational condition and in accordance with the manufacturer's instructions.

It is also required that the shipping company SMS includes clear instructions as part of "Identified Risks and the Appropriate Safeguards" for the use and maintenance of safety-limit switches, whether on deck, service spaces and/or the ships' Engine Room.
