

גרמניה

- Call for proposals on Applied Cancer research
- Call for proposals on Water technologies
- Call for proposals on Water technologies, regional cooperation

בריטניה

- Alternative Proteins; Advanced Food Packaging (sensors & materials)
- Quantum Technologies

איטליה

- Technologies for healthy soils (i.e - Novel fertilizers, soil implants, soil microbiome etc.)
- Materials and technologies for water treatment
- Precision optics, electronics and quantum technologies for next generation detectors, such as gravitational wave detectors

צרפת

- Alternative proteins from the sea, plant and cell culture.
- Development of technologies for food processing and conservation to ensure healthy and balanced nutrition for all
- Natural resource and ecosystem management: techniques for utilization of the sea for economic development such as: water desalination, energy production, isolation of chemicals, sea conservation and clean-up and sea agriculture (fish, sea food, seaweed, algae)
- Innovative cell therapies, bioactive proteins and nucleic acid based bioactive agents
- Engineering and digital: development of new materials for electronic applications.

צ'כיה

- Drug design and development
- Climate change, clean energy, desert research, water
- Artificial intelligence applications

סין

- Water technology, including: sea water desalination and drinking water decontamination, etc..
- Agriculture, including: high value nutritional food and reduction of food waste, etc..

קפריסין

- Protection of the marine environment and biodiversity
- Decarbonisation of ship operation
- Renewable energy production technologies
- Digital management and monitoring systems for the production and distribution of energy
- Energy efficiency in urban environments
- Translational Research on molecular and medical genetics for treatment of diseases.

M-ERA-NET

- Transnational RTD projects addressing materials research and innovation, including materials for energy generating and storing elements

הונגריה

- TBD
